

# Team 37 - UniFreelancer Academy

## CS Capstone - Progress Report: Sprint 1 (Pre-Sprint Enablement)

Date: 10/12/25

**Team Members:** Aidan Caughey, Aiden McCoy, Baron Baker, Daniel Molina, Nafizur Rahman

**Project Partner:** Alina Padilla-Miller - UniFreelancer

### Executive Summary

- Github repository has been created:  
<https://github.com/AidanCaughey1/CS46X-UniFreelancer>
- Communication channels established; talking primarily on our project discord; secondarily with project partner or ta via email
- Project board has been created
- 5-10 starter tasks queued: setup environment, design figma wireframe, connect Sharetribe, define user roles, test AWS deployment, research paywall options
- Meeting with project partner Thursdays at 3:30 PM weekly; Meeting with TA Fridays at 5 PM biweekly
- **Project inherited from existing UniFreelancer concept; Have not accessed codebase yet as just had initial project partner meeting yesterday.**

Follow-up email sent

### Communication Channels:

Channel	Purpose	Owner(s)	Expected Response Time	Recurring Meetings
Discord	Daily updates, quick questions, standups	Baron Baker	Within 24 hrs	As needed
Email	Partner & instructor correspondence, or escalation email	Aidan Caughey	24-48 hrs	Thursdays 3:30 PM (partner) Fridays biweekly 5:00 PM (TA)
GitHub Issues	Technical discussion & code review	All Members	Ongoing	N/A

Zoom	Weekly syncs & demos	Aiden McCoy	Weekly	Thursdays 3:30 PM (partner) Fridays biweekly 5:00 PM (TA)
------	----------------------	-------------	--------	---

**Commit History:**

- AidanCaughey1 Update README.md (5cc4a86 · now · 11 Commits)
- backend Create placeholder (3 days ago)
- documentation Create placeholder (3 days ago)
- frontend Create placeholder (3 days ago)
- .gitignore Create .gitignore (3 days ago)
- README.md Update README.md (now)

**README Content:**

CS46X-UniFreelancer

Team 37 for the OSU 2025 Capstone Project UniFreelancer Academy

UniFreelancer Academy is a collaborative learning platform that empowers freelancers and students to upskill through peer-led micro-courses, real-world projects, and mentorship. UniFreelancer Academy connects aspiring professionals with mentors and micro-learning experiences designed around practical freelancing skills.

This repository hosts the codebase, documentation, and project management rails for our capstone development.

**Team Roster:**

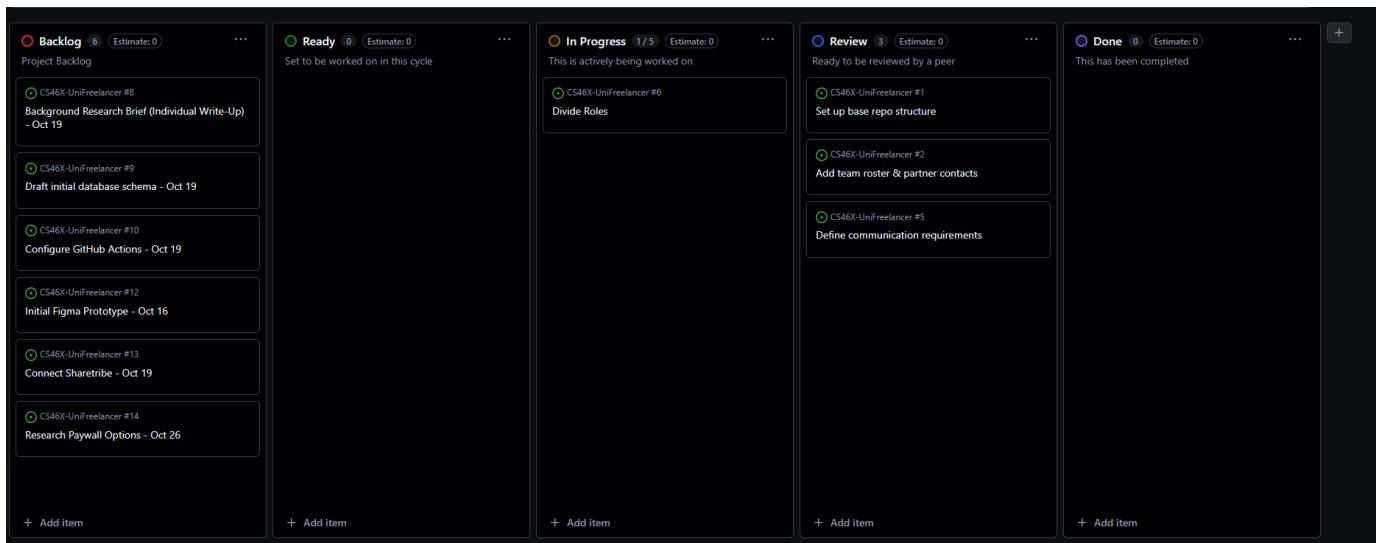

- Aidan Caughey | Roles | [caugheya@oregonstate.edu](mailto:caugheya@oregonstate.edu)
- Aiden McCoy | Roles | [mccoidae@oregonstate.edu](mailto:mccoidae@oregonstate.edu)
- Baron Baker | Roles | [bakerbar@oregonstate.edu](mailto:bakerbar@oregonstate.edu)
- Daniel Molina | Roles | [molinandan@oregonstate.edu](mailto:molinandan@oregonstate.edu)
- Nafizur Rahman | Roles | [rahmannaa@oregonstate.edu](mailto:rahmannaa@oregonstate.edu)

**Development Workflow:**

We follow a structured Git workflow to ensure code quality and collaboration efficiency:

- All new work is done in a feature branch.
- Changes are submitted via Pull Request (PR).
- Each PR requires at least one code review before merging.
- After approval, the PR can be merged into the main branch.

## PM Board Snapshot

## Inherited Project:

As stated above, UniFreelancer is an inherited project. We have sent our project partner a follow-up email asking how to get connected to her team at Horizon Labs and the existing codebase for UniFreelancer.
